# UNITED STATES PATENT OFFICE.

JOHN F. CUMMING, OF WORCESTER, MASSACHUSETTS, ASSIGNOR TO H. C. HANSEN, OF BOSTON, MASSACHUSETTS.

## DESIGN FOR A FONT OF TYPE.

SPECIFICATION forming part of Design No. 30,916, dated May 30, 1899.

Application filed March 25, 1899. Serial No. 710,510. Term of patent 7 years.

*To all whom it may concern:*

Be it known that I, JOHN F. CUMMING, a citizen of the United States, residing at Worcester, in the county of Worcester and State of Massachusetts, have invented and produced a new and original Design for a Font of Type, of which the following is a specification, reference being had to the accompanying drawing, forming a part thereof.

The drawing shows the capital and small letters, figures, and punctuation-marks of a font of type embodying my new design.

As shown in the drawing, the leading or material feature of my design for a font of type consists in producing curves at the junctions of all lines composing the letters which meet at an angle.

The capital letters E and F have their short middle lines and their top and bottom lines

as well as the top line of the letter T curved as shown.

Letters k and R have their lower outstroke curved gradually outward, and the letter Q has the same outward curved stroke.

As peculiar characteristics of the small letters, in addition to the curved corners at the junctions of the lines, the letters m and n have curved tops, as shown.

I claim—

The design for a font of type as herein shown and described.

In testimony whereof I have signed my name to this specification in the presence of two subscribing witnesses.

JOHN F. CUMMING.

Witnesses:

B. J. NOYES,

JENNIE L. HUTCHINSON.
