# UNITED STATES PATENT OFFICE.

WILLIAM W. JACKSON, OF PHILADELPHIA, PENNSYLVANIA, ASSIGNOR TO  
THE MACKELLAR, SMITHS & JORDAN COMPANY, OF SAME PLACE.

## DESIGN FOR A FONT OF PRINTING-TYPE.

SPECIFICATION forming part of Design No. 18,164, dated March 6, 1868.

Application filed February 9, 1868. Serial No. 263,530. Term of patent 7 years.

*To all whom it may concern:*

Be it known that I, WILLIAM W. JACKSON, (assignor to the MACKELLAR, SMITHS & JORDAN COMPANY,) of the city and county of Philadelphia, Pennsylvania, have invented a new Design for a Font of Printing-Type, of which the following is a specification.

The nature of my design is shown in the accompanying typographic impression, to which reference is made; and it consists of an ornamental letter.

The upper portions of all the letters except the B, C, D, G, P, R, and S are ornamented by the short horizontal lines, as shown. In the B, C, D, P, and R the upper portion of the letters is ornamented by a curved line proceeding in the B, D, P, and R from the up-and-down portion of the letters and curved to the right, and in the C from the upper right portion and curved to the left. The cross-line of the A and H consists of a horizontal line having a curved termination upon the left and shaded above and below by the shorter horizontal lines. The upper right terminations of the C, E, F, and G are curved and terminate in the dot. This termination is also found in the J and S at the base upon the left, in the L at the base upon the right, in the upper right termination of the S, in both the upper terminations of the T, and in both terminations of the Z at top and bottom. The lower right-hand termination of the K is shaded on each side by the short inclined lines. The faces of the M, N, O, Q, U, V, and W are ornamented by the short horizontal lines. The X is ornamented upon the right hand by a short inclined line proceeding from about the center of the letter. The Y is ornamented upon the right hand by a short inclined line proceeding from about the center of the letter.

The character of the design is preserved in the lower-case and in the numerals.

Having now described my invention, I claim as new—

The design for a font of printing-type, the same consisting of an ornamental letter, as herein shown and described, the upper portions of all the letters except the B, C, D, G, P, R, and S ornamented by the short horizontal lines, the B, C, D, P, and R having the upper portion ornamented by a curved line, proceeding in the B, D, P, and R from the up-and-down portion of the letter and curved to the right, and in the C from the upper right-hand portion and curved to the left, the cross-lines of the A and H consisting of a horizontal line having a curved termination upon the left and shaded above and below by a shorter horizontal line, the upper right termination of the C, E, F, and G curved and terminating in a dot, this termination also found in the J and S at the base upon the left, in the L at the base upon the right, in the upper right termination of the S, in both the upper terminations of the T, and in both terminations of the Z at top and bottom, the lower right termination of the K shaded on each side by a short inclined line, the faces of the M, N, O, Q, U, V, and W ornamented by the short horizontal lines, the X ornamented upon the right hand by a short inclined line proceeding from about the center of the letter, the Y ornamented upon the right hand by a short inclined line proceeding from about the center of the letter, and the character of the design preserved in the lower-case and numerals.

WM. W. JACKSON.

In presence of—

C. F. HUCH,  
HERMAN METTUS.
